

ERIC C. REEVES

Frontend Developer | React & TypeScript Specialist

Location: United States | Email: ecr.ceo@gmail.com | Phone: 919-745-1518
GitHub: github.com/EricCR85 | LinkedIn: linkedin.com/in/eric-reeves-36ab5514b

PROFESSIONAL SUMMARY

Performance-focused Frontend Developer with proven experience building responsive, accessible, and scalable web applications using React, Next.js, and TypeScript. Skilled in complex API integrations, state management, and modern CSS frameworks. Adept at conducting thorough code reviews, mentoring developers, and optimizing frontend performance.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Frameworks & Libraries:** React, Next.js, TailwindCSS, Redux, React Query, GSAP, ShadCN/UI
- **Tools & Platforms:** Git, GitHub, REST APIs, Vercel, Supabase, Firebase, Vite, Figma

PROFESSIONAL EXPERIENCE

Frontend Developer & Support Staff | Frontend Simplified (Remote)

Jan 2024 – Present

- Delivered structured code reviews and real-time debugging support for 20+ developers across complex React and Next.js projects, reducing common build errors by over 30%.
- Led technical workshops covering component architecture, state management patterns, and CI/CD deployment workflows.
- Conducted peer code reviews strictly enforcing WCAG accessibility guidelines and responsive design best practices.

Frontend Engineer | Skinstric AI (Remote)

Sep 2024 – Present

- Developed dynamic, interactive user interfaces using Next.js and TailwindCSS integrated with OpenAI Vision API endpoints.
- Optimized page rendering and animation workflows using Next.js Server Components, improving overall page load performance and UI fluidity.

PROJECTS

Prep AI – Interview Preparation Platform [[GitHub](#)] [[Live Demo](#)]

- Built an AI-driven interview preparation tool featuring dynamic interactive user flows and simulated database/authentication logic.

CryptoPulse Dashboard [[GitHub](#)] [[Live Demo](#)]

- Developed a real-time cryptocurrency tracking dashboard with interactive watchlists and live market charts.

SaaS Analytics Dashboard [[GitHub](#)] [[Live Demo](#)]

- Designed and deployed a functional TailwindCSS v4 dashboard with local storage persistence and dynamic chart visualizations.

Summarist – AI Summarization Web Application [[GitHub](#)] [[Live Demo](#)]

- Engineered a responsive Next.js and TypeScript web app featuring dynamic routing and optimized state management.

EDUCATION

Full Stack Engineering Certificate | Frontend Simplified

Jun 2023 – Jan 2024
