Raleigh, NC | eric.c.reeves@gmail.com | 919-745-1518 | github.com/EricCR85 | linkedin.com/in/ericcreeves

PROFESSIONAL SUMMARY

Frontend Developer specializing in building responsive, accessible, and dynamic web applications using React, Next.js, and TypeScript. Skilled in REST API integration, state management, and modern styling frameworks. Experienced in contributing to real-world software products in fast-paced collaborative environments.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries: React, Next.js, TailwindCSS, Redux, React Query, GSAP, Shadcn/UI
Tools & Platforms: Git, GitHub, REST APIs, Vercel, Supabase, Firebase, Vite, Figma

PROFESSIONAL EXPERIENCE

Frontend Engineering Intern | Skintrics (Remote) Nov 2025 – Present

- Developed dynamic, interactive user interfaces using Next.js and TailwindCSS integrated with OpenAI Vision API endpoints.
- Optimized page rendering and client-side performance using Next.js Server Components, improving overall page load times.
- Collaborated with team members to build, test, and ship clean, component-based code adhering to modern web performance standards.

FEATURED PROJECTS

Skintrics – AI Skincare Application [GitHub] [Live Demo]

- Engineered a responsive web application leveraging Next.js and TailwindCSS to deliver real-time AI-powered skincare analysis.
- Integrated RESTful API endpoints and optimized state management to handle interactive user inputs smoothly.

Prep AI – Interview Preparation Platform [GitHub] [Live Demo]

- Engineered an AI-driven interview preparation web app using Next.js, TypeScript, and TailwindCSS to process dynamic user preparation flows.
- Integrated authentication and state logic for persistent user sessions using Supabase/Firebase.

CryptoPulse Dashboard [GitHub] [Live Demo]

- Built a real-time cryptocurrency tracking dashboard featuring interactive watchlists and live market charts using React and REST APIs.

Summarist – AI Summarization Web Application [GitHub] [Live Demo]

- Built a Next.js and TypeScript single-page application incorporating dynamic client-side routing and optimized state management.

EDUCATION & TRAINING

Full Stack Engineering Program | Frontend Simplified Aug 2025 – Dec 2025

- Intensive program covering modern frontend architecture, state management patterns, and production-ready React/TypeScript workflows.
